

Reserve The Date to Meet People Who Care...

Join us on Wednesday, May 19, 2010
for a V.I.P Tour of the
Queen's Emergency Room

"This is Miniyha, pronounced min-eye-ah, a beautiful little girl who lives in Napa. She can light up a room with just her smile. Unfortunately, Miniyha was born with a multitude of problems, which are life-threatening. She has been seen in the Emergency Room at Queen of the Valley Medical Center many times; typically for respiratory distress and pneumonia. I bring Miniyha to the Queen with absolute confidence that she is going to receive the best care in the most efficient manner. Despite her poor prognosis, everyone in the Emergency Department is very concerned for her immediate care. She has been attended by several different Emergency Room physicians, nurses, respiratory therapists and radiology technicians. All have been amazingly attentive, kind and professional as they render the necessary care. I am so grateful to have this level of care so close at hand."

Kathie Respini, RN
Administrator at "Hannah's Children"
